Dickinson County, Michigan. Faced with the consolidation with the Green Bay processing center and reduction in local services in the Upper Peninsula’s only mail processing plant, the Dickinson County Board of Commissioners has begun a local and nationwide online petition campaign. The petition, which is available on change.org, is entitled “Demand the USPS Board of Governors Abandon the “Delivering for America Plan.”

By proposing a nationwide petition campaign, the board of commissioners hopes to unite with other individuals and communities across the nation who face the same concerns about potentially negative changes to America’s postal delivery system.

Speaking on behalf of Dickinson County, Commissioner Barbara Kramer stated, “The Dickinson County Board of Commissioners believes that our Kingsford, Michigan Post Office Processing Center MUST not only survive, but must expand to serve all of the residents of the Upper Peninsula of Michigan in a timely and efficient way. The proposed USPS DELIVERING FOR AMERICA plan takes away the efficiencies of our local distribution center and has the potential to damage our way and quality of life. Therefore, we strongly support any and all efforts by our congressional leaders to stop the rollout of this plan.”

The Dickinson County Board of Commissioners Petition can be found here.
